Global Relief Technologies, Inc. ("GRT"), headquartered in Portsmouth NH, together with VJV IT, headquartered in Fort Lee, NJ provide an unparalleled quality of service that supports both your short and long-term requirements for growth and customer satisfaction. We offer a truly personalized and professional service. Experienced software professionals and top-level technicians are always available at your fingertips, so you will never get lost in the pack or be subjected to a never-ending management escalation process.

GRTs core business of application development, implementation and support combined with VJV core services of Cyber Security, infrastructure design, and managed services allow us to provide full service for all your organization's IT needs and address both your infrastructure and application development. We are a GSA approved contractor and have been supporting US Department of Defense programs since 2007.

We understands the importance of having a reliable IT solutions provider. The reliability, availability, and performance of your core business applications can play an important role in the success of your organization. Therefore, the stability of your IT solutions provider is the key to that success. We are uniquely positioned to provide you with a solution that helps you meet both business-critical and technological requirements.
